

Stephen Evans is the Vice President of Safety for the Pacific Western Group of Companies which operates a fleet of over 4,000 Motorcoach, Transit, and School Buses in Canada; and runs charters into the USA.

Evans completed an Aviation Safety Management Diploma program from the Institute of Safety & Systems Management at the University of Southern California; has a BA in Geography from the University of Lethbridge; received his Canadian Registered Safety Professional (CRSP) certification; and has several decades of extensive transportation safety experience in both the aviation and highway modes.

In addition to giving presentations to a variety of industry associations and contributing articles to a number of magazines, he has presented at the SAE International Conference and also provided testimony as a driver safety subject matter expert at the NTSB Truck & Bus Safety Forum.

His association affiliations have included the American Bus Association, the American Society of Safety Engineers, the International Motorcoach Group, the Canadian Trucking Alliance, the International Society of Air Safety Investigators, the American Trucking Association, and the Canadian Society of Safety Engineering.

He served as the Chairman of the Bus Industry Safety Council (BISC) from 2014 to 2016 and is currently serving as Immediate Past Chair.
